— THE GAP

Connectivity
that **resets** at
every border.

1 /trip

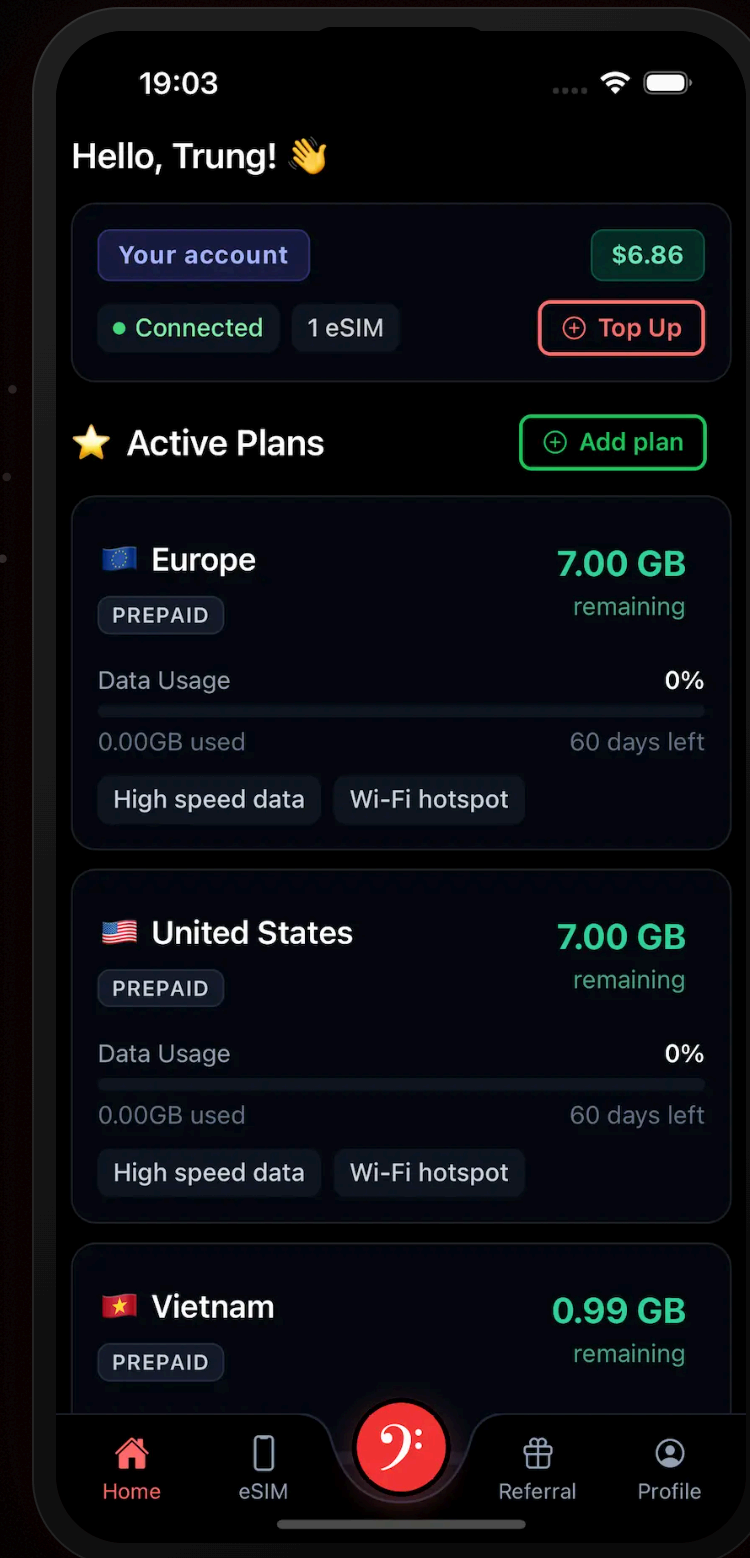

Every trip starts the same way — **buy a new eSIM**, pick from a **rigid menu** (3 GB / 7 days · 5 GB / 15 days) that almost never fits what you actually need, then **install it again**. Data expires the day you fly home; last month's eSIM is **dead today**.

— WHAT WE'RE BUILDING

One **lifetime eSIM.** Global connectivity, in real time.

Install it once, keep it for life. Stay connected with the people who matter — smoothly, everywhere you go. A real-time mobile data platform that finds the **best price** and **best quality** on every network, in every country.

● NOW CONNECTING · SINGAPORE

— THREE BETS

AI for the best global connectivity.

01

AI Companion

LIVE TODAY

A 24/7 travel concierge. Suggests the right plan before your trip, answers anything about coverage, billing, or activation — always available, in your language.

02

AI Dynamic Plans

LIVE TODAY

Regional and multi-country plans, shaped to your itinerary. One activation covers every destination — no more picking from a fixed menu that never quite fits.

03

AI Troubleshooting

LIVE TODAY

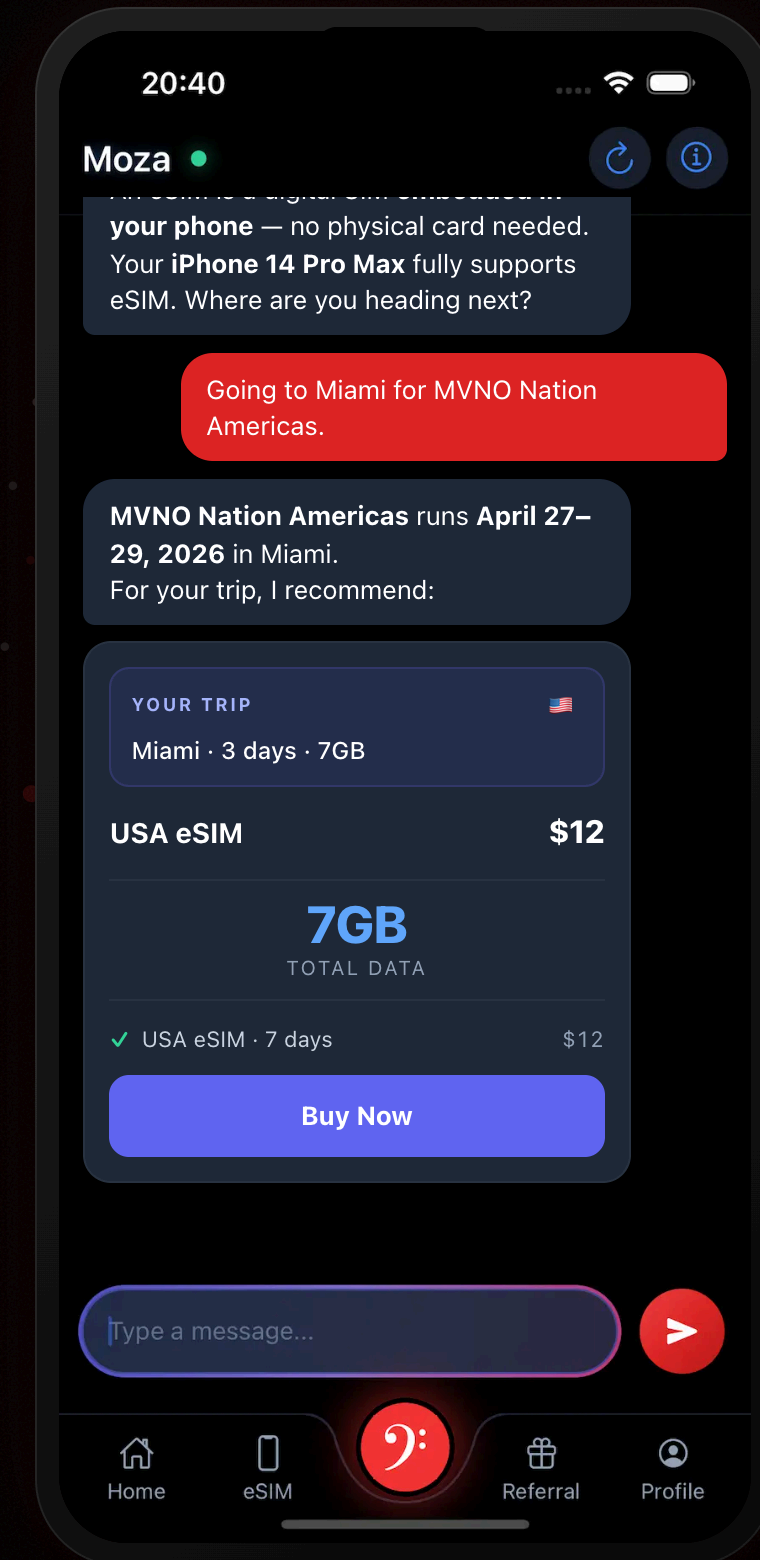

A background AI that watches your connection, carrier signal, and activation. Predicts issues and auto-heals what it can — silently, in the background. When it can't, it tells you exactly what to do.

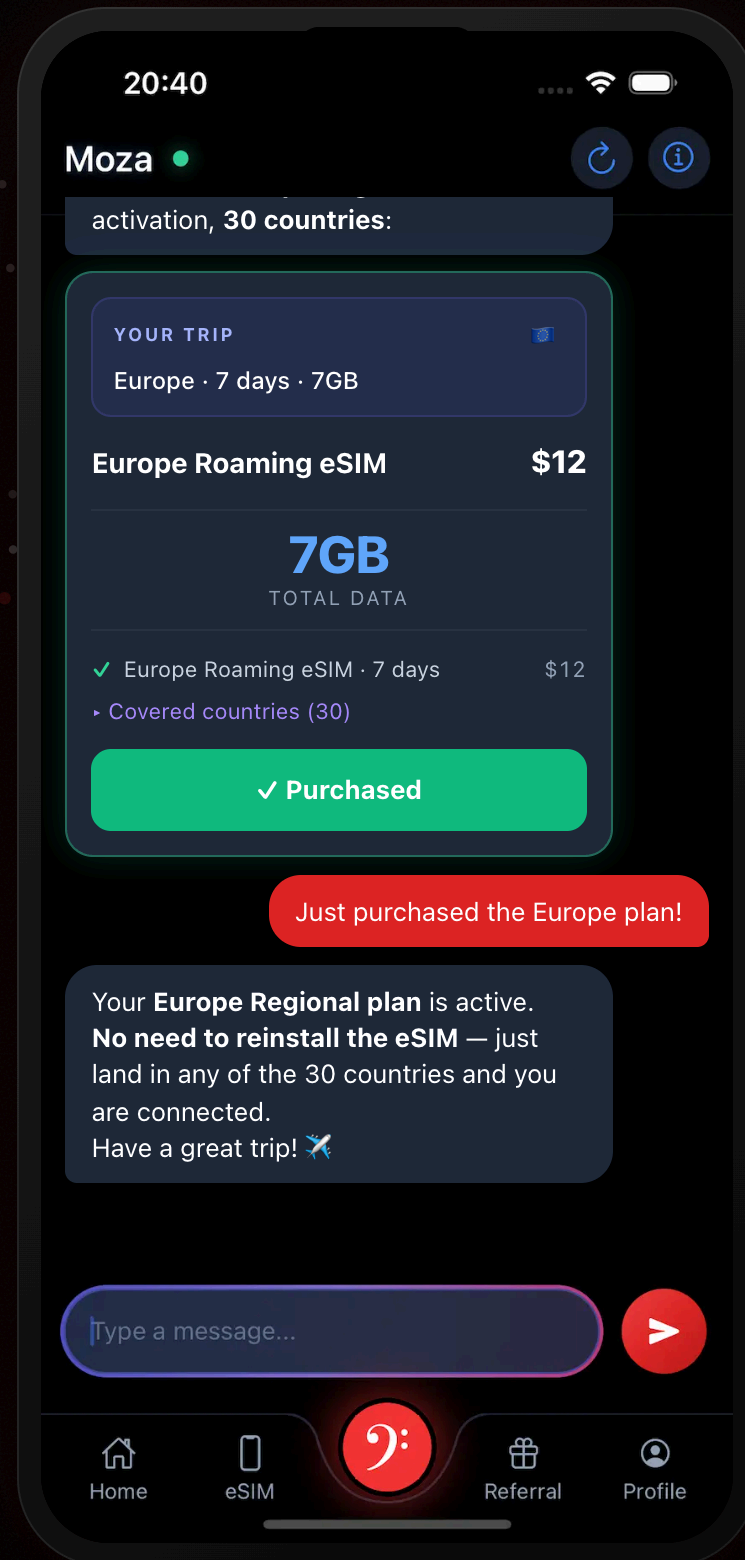

— LIVE TODAY

Your 24/7 connectivity concierge, not a telco hotline.

Moza is there whenever you need help — planning, buying, activating, or just asking a question. Proactive before you need it, responsive when you hit a snag, fluent in your language.

- Suggests the right plan for any country, any duration
- Answers coverage, billing, activation — anytime
- Multi-language chat, available 24/7

— LIVE TODAY

One activation. Every destination.

Regional plans cover a whole continent. Multi-country plans cover your exact itinerary. The eSIM roams to the local network as you cross borders — you do nothing.

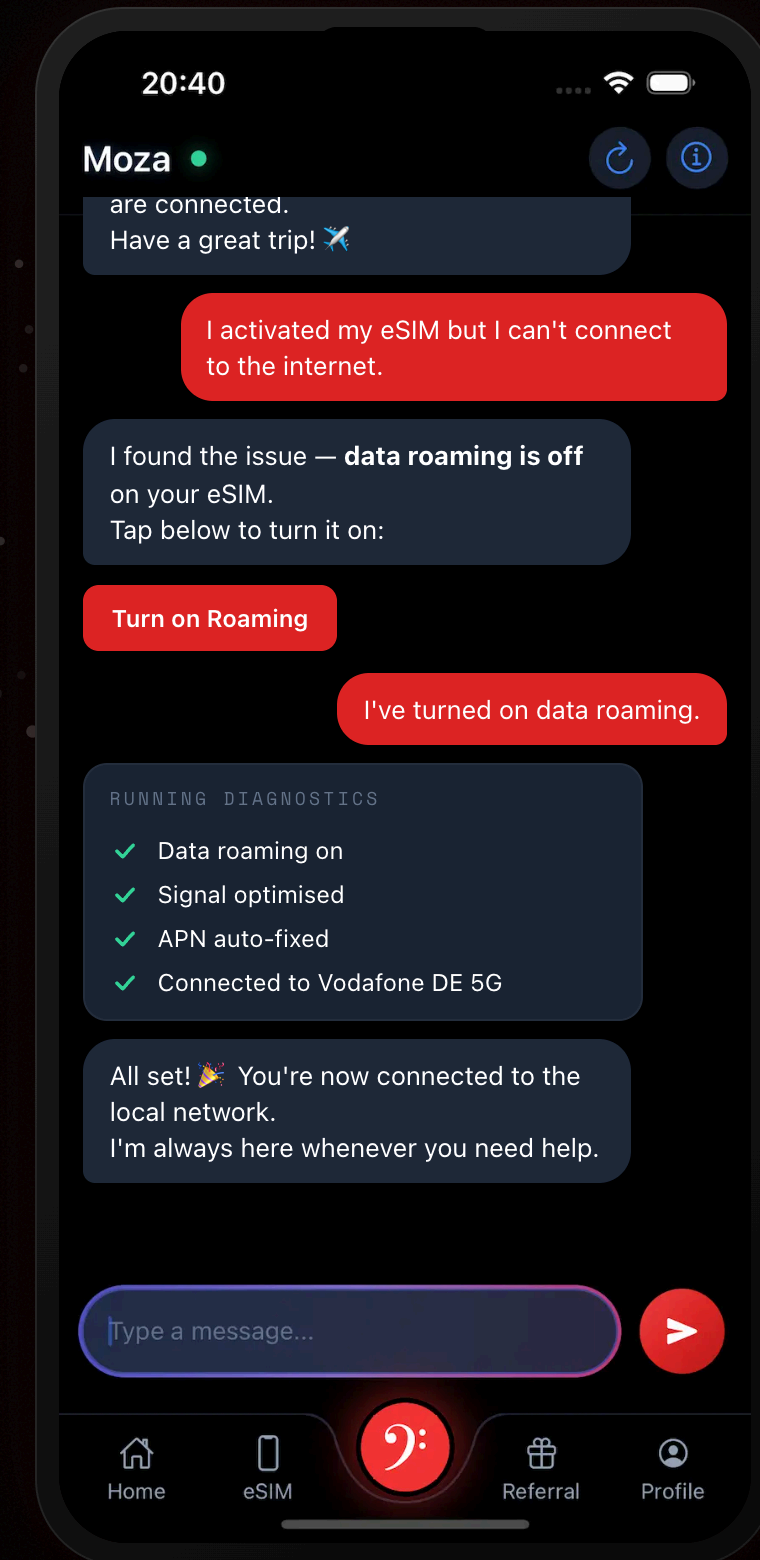

- Regional plans — one eSIM for all of Europe, Asia, or the Americas
- Multi-country — activate once, connect in every country you visit
- Automatic local-network handoff at every border

— LIVE TODAY

The connection heals itself — or tells you exactly how.

A background AI watches your network, carrier, and activation state. It predicts problems, auto-heals silently when it can, and when it can't, it walks you through the one thing you need to tap on your device.

- Monitors connection, carrier signal, and activation status
- Auto-heals what it can — silently, in the background
- Clear on-device guidance when you need to act

— EVOLUTION

From local SIMs to a **global network** that goes with you.

MAY 2026

Multi-eSIM

Hold and switch between active profiles without re-scanning.

JUNE 2026

Family plans

One account covers the whole family — every device, every country. Shared pool, per-device controls.

AUGUST 2026

Loyalty & rewards

Miles, status tiers, and partner perks — travel-native, not retrofitted.

2027

Worldwide · direct carriers

Every country on Earth. Direct deals with local carriers for better price and network quality.

BEYOND MANUAL CODE

AI-augmented engineers. AI-augmented development.

10x TEAM THROUGHPUT
Engineers expand. Cycles compress. Quality holds.

1w SPRINT CYCLE

5 ENGINEERS

>90% AI-GENERATED

100% HUMAN-REVIEWED

DISCOVER · No tech barriers

Any business problem becomes a technical solution. Engineers explore stacks, domains, and APIs without prior expertise.

SPEC · Hours, not weeks

One-line idea to a full PRD — flows, edge cases, acceptance tests — drafted by AI and refined by the team in a sitting.

DESIGN · Rapid feedback loop

Build → show → feedback → build, iterated in minutes. Interactive prototypes replace long discovery cycles.

BUILD · Fast code, high coverage

No more manual slow coding — AI writes the plan, the code, and the unit tests. A human reviews every diff before it lands.

SHIP · Adapt in minutes

Gradual rollout, AI-monitored telemetry, auto-summarised learnings. Problems are solved in minutes, not days.

eSimphony.

Try the first AI mobile companion for global travelers.
